Professional Statement

Once upon a time, I fell in love with Apple products and decided to write code, exploring the programming languages associated with it.

I am an **iOS Developer** specializing in mobile application development, object-oriented design, and programming. I collaborate with stakeholders and UX teams to shape the product vision and create seamless user experiences. I am interested in building cutting-edge features in social media apps.

I am passionate about **AR and Machine Learning** and have a good understanding of various fields, including **IoT, AI, and Game Development**.

Experience

[Dsquares](#) / Senior iOS Developer

Oct 2021- Present, Smart Village, Giza Governorate, Egypt

- **Enhanced feature rollouts** by revamping the **Universal App**, serving 152 merchants and 3,387 branches across Egypt, as well as additional locations in Saudi Arabia, Jordan, and Dubai.
- **Developed and implemented key features** in React Native projects—including onboarding, dropdowns, pop-up messages, QR code scanning, and asynchronous API calls—integrating them into ExxonMobil's [Consumer](#) App (serving 500K+ users) and [Trader](#) App.
- **Built a [VAT](#) app** using the **VIPER design pattern**, incentivizing citizens to purchase products and earn coupons, vouchers, and points by scanning QR codes from merchants.
- **Shared iOS expertise with teammates** to enhance collaboration and efficiency.

Tech Stack: Swift, Objective-C, Swift UI, Jira, Bitbucket, Source Tree.

[Robusta Studio](#) / iOS Trainee

Mar 2020 - May 2020, New Cairo, Cairo, Egypt

- **Learned and applied code quality best practices**, including code organization and formatting for readability.
- **Focused on iOS project architecture**, implementing MVC and the delegation pattern.

- **Utilized Grand Central Dispatch (GCD)** to improve app responsiveness, interactivity, and efficiency.
- **Implemented asynchronous API calls** and used JSON to store and retrieve data from the server.
- **Shared GitHub basics** with colleagues in a technical session.

Tech stack: Swift, Core Data, GCD, GitHub.

Skills

Concepts	Design Patterns	OOP	Algorithms	Data Structures	System Design
Languages	Swift	Objective-C	Java Script	Swift UI	
Technologies	Firebase	Alamofire	Lyft Mapper	Core Data	Source Tree
Tools	Xcode	Mixpanel	Jira	Bitbucket	Visual Studio Code

Education

Bachelor's Degree of Computer Science from Faculty of Computers and Information

Sep 2013 -Jul 2017, Mansoura University

Grade: Good

Graduation Project - Sallefny App.
